YUEMA

PUMP

XA SERIES

XA Pump
Stainless Steel

XA Pump

Design	: Performance and dimensions referring to the European standard BS En733/ DIN24255.
Structure	: Horizontal, Axial End-Suction, Single-Stage, Single-Suction, Volute Casing, Back pull-out, Centrifugal Pump
Flange	DIN2501(ISO7005.2 or GB/T17241.6 PN1.6) standard, ANSI B16.5 Class150lb optional
Rotation	: Clockwise viewing from the drive side
MATERIAL	Casing : Cast Iron standard, Ductile Iron, Stainless Steel optional Impeller : Bronze standard, Cast Iron, Stainless Steel optional Shaft : ASTM420 standard, ASTM304, ASTM316, ASTM1045 optional Shaft Seal : Mechanical Seal standard (Carbon-Ceramic/Nition standard, Caron-Sic/Won optional, Gland Packing optional)
OPERATING RANGE	Flow Rate (Q) : 2-1100m ³ /h Head (H) : 2-150m Speed : 1450 or 2900 rpm (50Hz) Temperature : 1750 or 3500 rpm (60Hz) Working : 10°C to 105°C, 10 Bar standard, 16 Bar on request

Application

- XA is used for handling clear water of the liquids similar to the water physically and chemically finding the applications for water feed and supply service in mine, plants and towns. air-conditioning, extinguishing and irrigation.
- In spite of the same specification, the pump's performances vary with the diameter of the impeller. (indicated with the block letters A, B and C in the end of the designation of the type.)
- The pump is simple in structure, reliable in performances. small in size, low in power consumption, convenient in maintenance and of good cavitation proof.
- XA has 60 specifications with the shaft in four sizes, suitable for various handling duties. For the pump with a same specification, the components, such as shaft, bearings, shaft sleeve, shaft seal and the fasteners of impeller are interchangeable. In addition, only live types of hearing brackets are applied to the whole series.

Specifications

Speed	: 2900r/min, 1450r/min or 1480r/min
Max. Capacity	: 132L/s 300L/s
Max. Head	: 155m 58m
Max. Speed	: 3500r/min. (when using the power of 60Hz. the dia. of impeller is reduced.)
Max. Working Temperature	: 105°C
Shaft Seal	: Packing or mechanical seal
Min. Working Temperature	: -10°C
Working Pressure	: Generally it is 1 Mpa. while the parts of undertaking pressure of XA40132G, XA50/326, XA65/326, XA80/32(l are fabricated with nodular cast iron or cast steel, it can increase to 1.6Mpa. When needed to apply to the other pumps. please state in the order.
Applicable Standard	: Q/FP 2101-2002

KENFLO®

KENFLO PUMP

XA Oil

XA Grase

XA
Stainless Steel

XO pump series

High Efficiency

ISO 2858 / 5199 Standard

Application

- Circulation of liquids
- Condenser water
- Heating water
- Irrigation
- HVAC
- Dewatering
- Mineral processing
- Dust suppression
- Chemical transfer

Design Features

This pump includes the back pull-out design, and when a suitable spacer coupling is fitted to a direct coupled unit, the casing and motor can remain in position while all other pump parts can be removed for simple and quick maintenance.

The volute casing is fitted with a replaceable wear ring and has a suction vane to give smooth flow into the double shrouded hydraulically balanced impeller.

Only five shaft assemblies are required to cover the total range and this gives many common interchangeable parts for pumps fitted to the same shaft.

The standard pump is fitted with a mechanical seal chamber.

Pumps can be supplied as a bare shaft unit, or in many other arrangements, including complete with coupling, guard, base plate and either electric motor or engine.

Technical Information

36 Sizes in the range
Capacity to 1600 m³/h
Head to 160 m

Maximum Temperature

With standard mechanical seal 10°C to 140°C.

Maximum Pressure

Operating pressure 1.6 Mpa to 2.4 Mpa
Maximum test pressure 3.6 Mpa.

Maximum Speed

Maximum direct coupled Speed for pumps varies between 3600 RPM and 1500 RPM depending upon pump size and method of drive.

KCB SERIES GEAR PUMP

1. Application

It applies to delivering non-corrosive lubricating-oil or equivalent liquid without solid particles and fibres at temperature below 80°C and with the viscosity of $5 \times 10^{-6} \sim 1.5 \times 10^{-3} \text{ m}^2/\text{s}$ (5-1500cSt).

2. Application Scope

It can give performance as transfer pump or booster pump in oil delivery system. It can be also applied as a fuel pump for delivery system, pressurization and injection in fuel supply system and in all industry fields as lubricating pump.

3. Structure Features

- KCB Series gear pumps are mainly composed of gears, axles, pump body, pump cap safety valve and axle-end seals etc. The heat-treated gears have the advantage of higher hardness and intensity, and rotate with the axles inside the replaceable bearing sleeves. All of pump's part can be lubricated by delivered medium when working.
- The pump is properly designed with leakage and return chute, which lets the gears bear the least torque force and reduces load and wear on bearings in order to raise pump's efficiency.
- It is also designed with safety valve for protection against overload, The full return flow Pressure of the safety valve is 1.5 times higher than the rated exhaust pressure of the pump, It can be also adjusted within the allowance of exhaust pressure range according to circumstances. But please note the safety valve can't be applied as pressure reducing valve for long time. You may install pressure-reducing valve separately on pipe-line if needed

2CY SERIES GEAR PUMP

1. Application

It applies to delivering non-corrosive lubricating-oil or equivalent liquid without solid particles and fibres at temperature below 80°C and with the viscosity of $5 \times 10^{-6} \sim 1.5 \times 10^{-3} \text{ m}^2/\text{s}$ (5-1500cSt).

It applies to hydraulic system, too.

2. Application Scope

It can give performance as transfer pump or booster pump in oil delivery system, and a fuel pump for delivery, pressurization and injection in fuel supply system. It can be also applied as hydraulic pump supplying hydraulic power in hydraulic system and in all industry fields as lubricating pump.

3. Structure Features

- 2CY series gear pumps are mainly composed of gears, axles, pump body, pump cap, bearing sleeves and axle-end seals, etc. The nitriding-treated gears have the advantage of higher hardness and wear property, and they rotate with the axles inside the replaceable bearing sleeves. All of pump's parts can be lubricated by delivered medium when working.
- Four bearing sleeves are installed suspended in pump body and can be automatically adjusted with facing gaps clearance complying with pressure change, therefore, it results in stable pump pressure, little discharge, flow pulsation and higher volume efficiency.

YCB SERIES GEAR PUMP

1. Application

It applies to delivering non-corrosive lubricating-oil or equivalent liquid without solid particles and fibres at temperature below 80°C and with the viscosity of $5 \times 10^{-6} \sim 1.5 \times 10^{-3} \text{ m}^2/\text{s}$ (5-1500cSt). It applies to hydraulic system, too.

2. Application Scope

It can give performance as transfer pump or booster pump in oil delivery system, and a fuel pump for delivery, pressurization and injection in fuel supply system. It can be also applied as hydraulic pump supplying hydraulic power in hydraulic system and in all industry fields as lubricating pump.

3. Structure Features

- 2CY series gear pumps are mainly composed of gears, axles, pump body, pump cap, bearing sleeves and axle-end seals, etc. The gears are adopted double circular teeth shape, which makes the gears less wear on gear surface, stable revolution, low noise, long service life and high efficiency, due to no sliding on the teeth during gear falling-in. This kind of pump has got rid of traditional design and come into a new decade in designing and application.
- The pump is designed with safety valve for protection against overload. The full return flow pressure is 1.5 times higher than the rates exhaust pressure of the pump. It can be adjusted within the allowance of exhaust pressure range according to Circumstance. But please note the safety valve can't be applied as pressure-reducing valve for long time. You may install pressure-reducing valve separately on pipe-line if needed.
- There are two kinds of axle-end seals, mechanical seal and packing seal, which can be chosen according to the clients' requirements of application circumstance.

YCB-G ASPHALT PUMP

1. MODEL EXPLANATIONS

2. PERFORMANCE DATA

Model	mm	M ³ /h	Mpa	(NPSH) _r m	r/min
YCB 6/0.6G	40	6	0.6	6	960
YCB 10/0.6G	65	10	0.6	6	320
YCB 12/0.6G	65	12	0.6	6	383
YCB 25/0.6G	80	25	0.6	6	252
YCB 40/0.6G	80	40	0.6	6	417

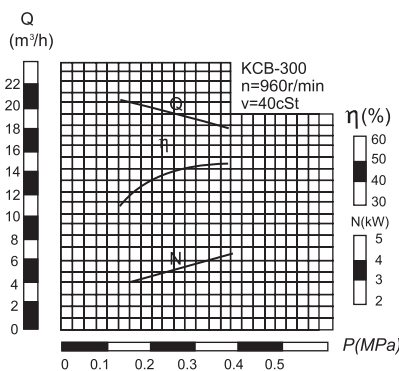

DIAGRAM OF PERFORMANCE CURVE

Performance data of all gear pump have been defined on basis of the viscosity of $4 \times 10^{-3} \text{m}^2/\text{s}$ (40cSt). The data indicated in the performance diagram is suitable to medium viscosity of $1 \times 10^{-5} \sim 8 \times 10^{-5} \text{m}^2/\text{s}$ (10~80cSt). Of which exceeds the above viscosity, the data will be re-defined according to client's demands.

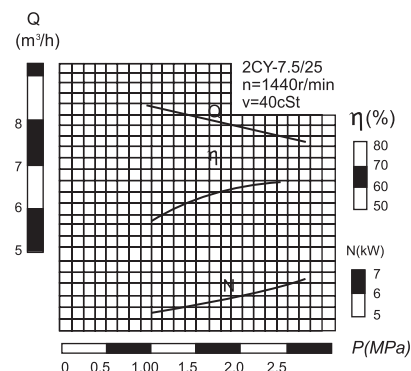

The given exhausting pressure of all gear pumps is the highest working pressure, and pumps can perform normally within range of the rated working pressure, which can be found in diagram No.1

SIHI'S PUMP
MADE IN GERMANY

PROFESSIONAL QUALITY PUMPS

Application

- Waterworks, and water supply
- Boiler feed
- Pressure boosting
- Irrigation
- Filtration
- High pressure cleaning
- Heating
- Condensate systems
- Reverse osmosis
- Water treatment plants
- and many more ...

Technical Data

Flowrate:	max. 75 m ³ /h
Head:	max. 250 m
Speed:	max. 3600 rpm
Temperature:	-15 to +120°C
Pressure Rating:	max. 25 bar
Shaft seal:	mechanical seal
Direction	clockwise, when viewed from motor side

DELTA
DELTA ELECTRONICS, INC.

PT. RODA ROLLEN INDONESIA is a supplier for Mechanical dan Electrical engineering product for modern general industries. The company was established in 1998 and since then has become a stockist and representatives agents for many leading brands in industrial engineering from around the world such as :

- REVVO CASTOR AND WHEELS UK
- CANTONI MOTORS POLAND
- SOUTHERN CROSS AUSTRALIA
- SPECK PUMPEN GERMANY
- BISHAMON JAPAN
- KOSHIN JAPAN
- DELTA AUTOMATIONS TAIWAN
- And many more.

Our objective is to be a reliable main partner for Indonesian industries by supplying a wide range of high quality products to ensure high efficiency result.

PT. RODA ROLLEN INDONESIA adalah pemasok produk Mekanik dan Elektrik di bidang teknik untuk industri umum yang maju. Perusahaan ini didirikan pada tahun 1998 dan sejak itu telah menjadi stockist dan agen perwakilan untuk merek-merek terkemuka di bidang teknik industri dari seluruh dunia seperti:

- REVVO CASTOR AND WHEELS UK
- CANTONI MOTORS POLAND
- SOUTHERN CROSS AUSTRALIA
- SPECK PUMPEN GERMANY
- BISHAMON JAPAN
- KOSHIN JAPAN
- DELTA AUTOMATIONS TAIWAN
- Dan lain lain.

Tujuan kami adalah untuk menjadi mitra utama yang dapat diandalkan untuk para industri di Indonesia dengan cara menyediakan berbagai macam produk berkualitas tinggi untuk memastikan hasil efisiensi yang tinggi.
